

# K2 Five Performance Optimization

Helping you get the most out of your K2 Five investment

- K2 Five is an immensely powerful and flexible platform for automation of business processes and applications - with many ways to architect, build and maintain solutions.
- InnoVelocity's K2 architects have unparalleled experience helping customers optimize their applications and utilize the platform to its fullest.
- We are offering valued K2 customers a *fee-waived virtual health-check service* to help you ensure your K2 solution is delivering optimal performance:
  - Review K2 Platform installation & configuration for technical performance, maintainability, and scalability – including guidance on platform upgrades.
  - Review Application design and architecture for technical performance, maintainability, and scalability.
  - Review maintenance and support procedures for efficiency and effectiveness, including opportunities to automate.
  - Provide methods for identification, quantification, and prioritization of new automation opportunities, and assess currently known automation candidates.
- The InnoVelocity team will provide you with a complete report including design or implementation recommendations, configuration settings recommendations, and on-going preventative recommendations.
